

Release notes

New features for Virtual Visual Planner have been developed.

In the upcoming release will the new features and changes become available.

VVP – New features & changes

Extended solid color palette

Selectable colors in palette

Correction on entering color description

Automatic font color selection based on post-it color

Link under post-it is opened on click into default browser

Extension of icons on post-it

Sub-headings on both text and date project boards

Locking position of post-it when writing in them (pen icon as indicator)

Editing Swimlanes (text type based)

Office 365 - Outlook task and calendar integration

The managers' initials and creation date on the board in the board list

Possible to adjust the number of columns up to 24

Color annotation now appears in the color of the note in the note menu

"Reference" changed to "User guides" in the menu

Titles in the sidebars can be customized as needed

Copy / paste (CTRL + c / CTRL + v) of note within the board

Go to the "first known position" button in the text board type

Delete icon (trash bin) made more accessible in the note

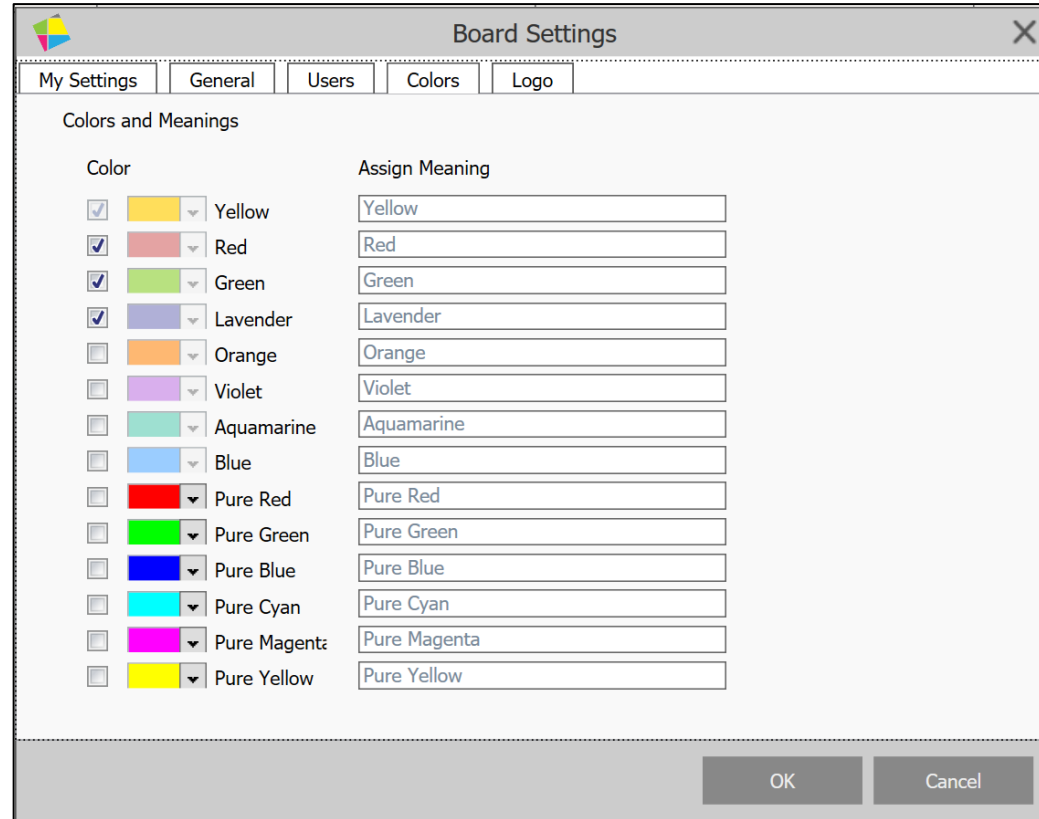

Export of notes to Excel for a text board now works when selecting "Export everything"

The scaling of the mini-menu container (icons)

Mobile client / web client

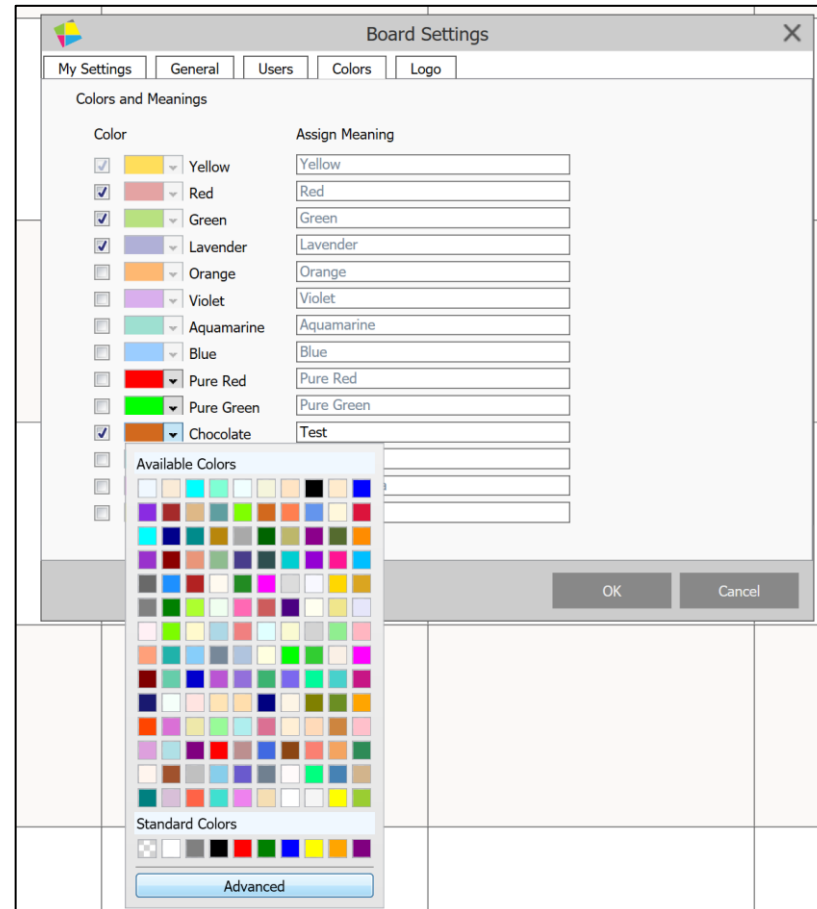

Extended solid color palette

Several colors have been added as a fixed option for post-it (Pure colors).

Selectable colors in palette

It is possible to choose your own color combinations based on the newly added colors.

Correction on entering color description

When you have to give the post-it colors a meaning, the default color meaning will be cleared by clicking on the input field and here it will then be possible to enter the meaning immediately without first having to remove the default meaning.

Colors and Meanings	
Color	Assign Meaning
<input checked="" type="checkbox"/>  Yellow	<input type="text" value="Yellow"/>

Colors and Meanings	
Color	Assign Meaning
<input checked="" type="checkbox"/>  Yellow	<input type="text"/>

Colors and Meanings	
Color	Assign Meaning
<input checked="" type="checkbox"/>  Yellow	<input type="text" value="Kommentar"/>

Automatic font color selection based on post-it color

There will now be automatic font color based on the post-it background color. For a dark background color, the text in the post-it will automatically be white and for a light background color, the text will be black.

Link under post-it is opened on click into default browser

It will be possible to insert a link in the link field in a post-it and by clicking on the link it will be opened in the default browser. If the link lacks a protocol in front of it, then "http: //" will by default be inserted in the front of the link text. It's possible to insert other protocol types, e.g. "Mailto:", then it will be possible to select a mail program.

Extension of icons on post-it

Several icons have been added to the post-it, including a stop / hold (hand) icon, an alert icon and a minus icon.

Sub-headings on both text and date project boards

It will now be possible to write a sub-heading on all board types. Below are examples of sub-headings according to a "Days and weeks combined" project board type and a "text" project board type.

Virtual Visual Planning

		Task		QA Test Board			
Project	Purpose	Success criteria	1	Monday Week 21	Tuesday Week 21	Wednesday Week 21	Thursday Week 21
				Subtitle 1	Subtitle 2	Test of subtitle	

Virtual Visual Planning

		Task		QA Text Board			
Project	Purpose	Success criteria	1	Text 1 Text 2	Text 3 Text 4	Test of title	
				Subtitle 1	Subtitle 2	Test of subtitle	
Track 1							

Locking position of post-it when writing in them (pen icon as indicator)

Added a position lock on the post-it when another user holds the individual post-it. You will not be able to move the post-it until it is released again. When someone works (write) in a post-it it will be indicated by a pen icon (animated) and who's (initials) working in the post-it (displayed on the side of the post-it).

Editing Swimlanes (text type based)

Rows: It will be possible to add / move / remove rows (right click on the row title).

Columns: It will be possible to add / remove columns (right click on the column header).

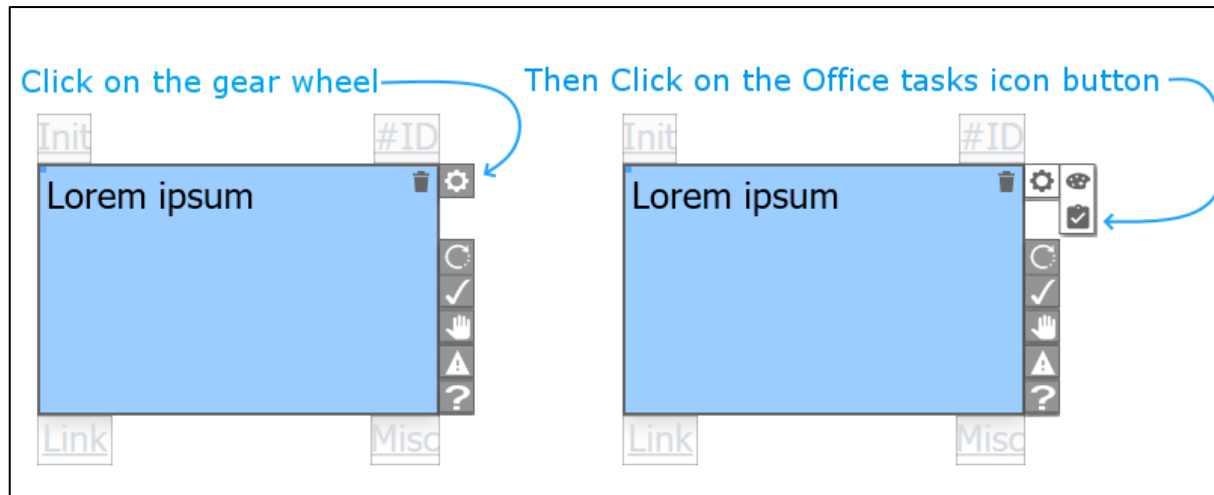

Office 365 - Outlook task and calendar integration

NOTE. The Outlook desktop application must be installed on the machine.

Delegation of task/appointment by post-it:

The first screenshot below shows how to navigate to the delegate task window for the post-it.

By clicking on the setup button (gear-wheel icon), it will be possible to open the delegate task/appointment window which are shown on the second screenshot.

In the task/appointment delegation window, you can choose which type is to be delegated, here you can choose whether it should be "By Outlook Appointment" or "By Outlook Task".

By Outlook Task:

When "By Outlook Task" is selected, the window will contain "subject", "message", "recipients", "start date", "due date", and possible "reminder on due day".

Subject: here you can enter the topic of the task.

Message: shows the post-it text and the message will be placed and displayed in the body of the Outlook task item.

Recipients: which emails should receive the task (the sender is automatically included). If left empty, then the sender will be the only receiver.

Start date og Due date: The task starts date and due date.

Reminder: If wanted the "reminder on due day" can be marked (only those in Outlook).

Subject:
Appointment/task from Virtual Visual Planner

Message:
Postit:

By Outlook Appointment
 By Outlook Task

Recipients (e-mail addresses separated by ;):

Start date: Select a date [15]
Due date: Select a date [15]

Reminder on due day

Send Close

By Outlook Appointment:

When "By Outlook Appointment" is selected, the window will contain "subject", "message", "recipients", "appointment date", "start time", "end time" and a tick option for "all day event".

Subject: here you can enter the subject of the appointment.

Message: shows "post-it" text and the message that will be placed and displayed in the body of the Outlook appointment.

Recipients: which emails should receive the appointment (the sender is automatically included). If left empty, then the sender will be the only receiver.

Appointment date, start time and end time: Date and start/end time of the appointment.

All day event: Possible to set an appointment to last all day on the appointment date.

Delegate task

Subject:
Appointment/task from Virtual Visual Planner

Message:
Postit:

By Outlook Appointment
 By Outlook Task

Recipients (e-mail addresses separated by ';')

Appointment date
16-01-2023

All day event

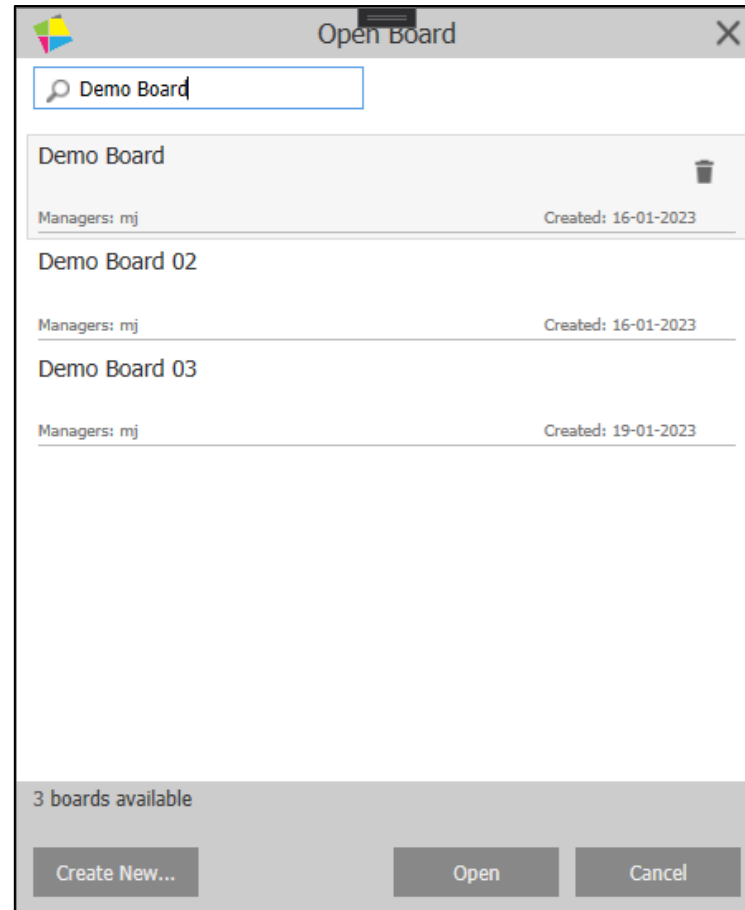

Start time
12:00

End time
12:00

The managers' initials and creation date on the board in the board list

It will now be possible to see the managers' initials and creation date based on the individual board in the board list and you can search on manager initials in the list for which boards a certain manager has created / been assigned.

Possible to adjust the number of columns up to 24

It will now be possible to adjust one's board setting for columns to show up to 24 columns in one's view. Before, the limitation was up to 15 columns.

The screenshot displays the Pallas Informatik software interface. At the top left, the logo for Pallas Informatik is visible. The main area is a grid-based board titled "Demo Board 03". The board has a header row with four columns labeled "Header title 1", "Header title 2", "Header title 3", and "Header title 4". Below the header is a subtitle row labeled "Subtitle 1". The board is divided into six horizontal tracks, labeled "Track 1" through "Track 6". Track 1 contains a red note labeled "Text 1". Track 2 contains a purple note labeled "Text 2". Track 5 contains a green note. A "Board Settings" dialog box is open in the center of the screen. The dialog has tabs for "My Settings", "General", "Users", "Colors", and "Logo". Under the "Main Board" section, the "Columns" dropdown is set to 24, and the "Rows" dropdown is set to 6. Under the "Layout" section, there are sliders for "Size of notes", "Text size on", "Row text siz", "Column text", and "Sidebar text". Under the "User Interaction" section, there are checkboxes for "Show con" (checked) and "Open note on single click" (unchecked). The dialog has "OK" and "Cancel" buttons at the bottom right.

Color annotation now appears in the color of the note in the note menu

Color annotation will now appear in the note on the note menu. If the text becomes long, it will be shortened and displayed with "...".

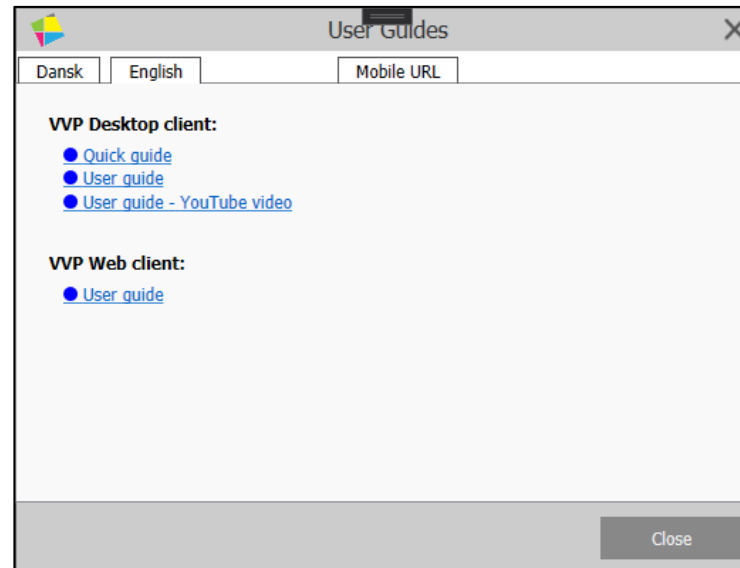

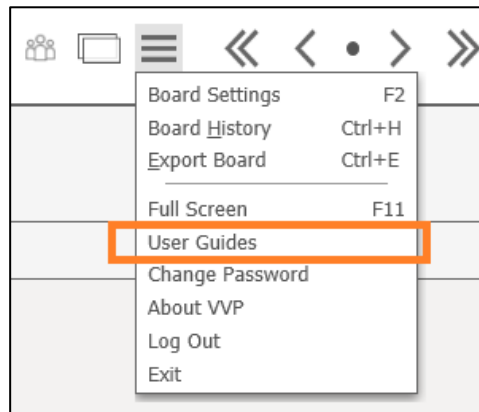

You will still be able to hover the mouse over the note in the note menu on the board and see the annotation.

"Reference" changed to "User guides" in the menu

"Reference" in the menu changes to "User guides".

By selecting "User guides" a window opens with links to user guides, here you can choose to view user guides in Danish or English and a QR-code/URL path for the Web client is available under the "Mobile URL" tab.

Titles in the sidebars can be customized as needed

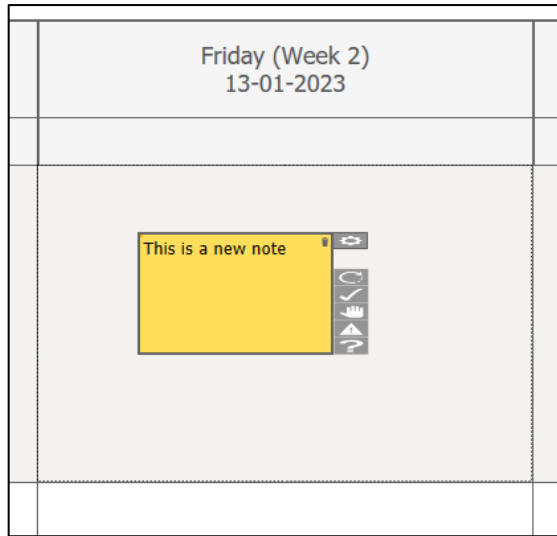

Titles in the sidebars of the board can now be customized according to your needs. However, this only applies to standard board variants.

Copy / paste (CTRL + c / CTRL + v) of note within the board

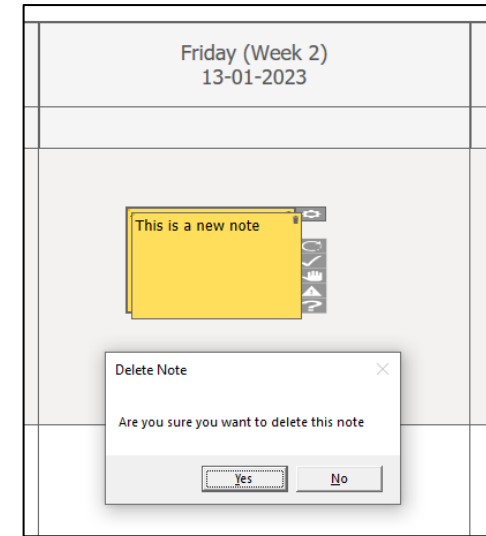

It is possible to copy a note and insert the note within the same board. You can also choose to make a "clip" of the note with CTRL + x. If you choose to make a "cut" of a note, you will get a yes/no window to delete the note you want to cut.

Left click on the note and do a CTRL + C (copy)

Do a CTRL + V (paste)

CTRL + X (clip)

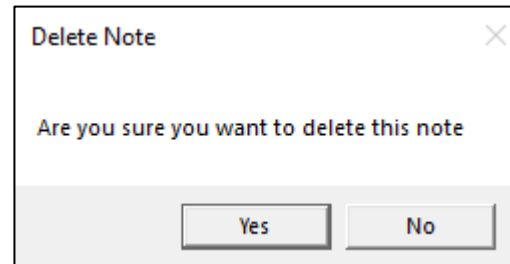

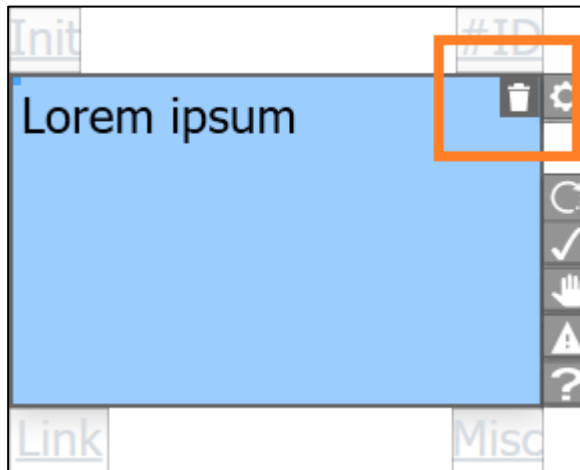

Go to the "first known position" button in the text board type

It is now possible to find back to the first column in one's text board (first known position), here there is a dot button in the navigation menu (a form of a "Home" button).

Delete icon (trash bin) made more accessible in the note

The delete icon has been made easier to find and use in the note. The location has been moved from the note menu to directly in the top right corner of the note. By clicking on the Delete icon button, you get the option in the form of a yes/no pop-up window for deleting the note.

Export of notes to Excel for a text board now works when selecting "Export everything"

Exporting all notes from a text board now works, but not quite like a date board type. That is that the starting point is the last column of notes in one's viewport, when you then select "Export everything" under "Export board" in the board menu, will create an export to Excel with all notes from the last column and back to the first column with notes. Thus, if you go to the very last column you have on your board that contains notes and do an export (export everything), you will get all the notes from your board.

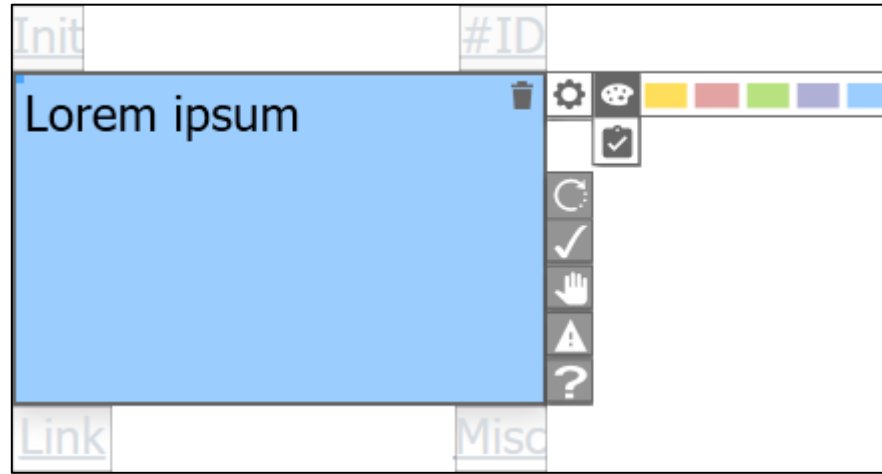

The image shows a screenshot of the Pallas Informatik software interface. The main window displays a text board titled "Demo Board 03" with a grid layout. The grid has six tracks (Track 1 to Track 6) and several columns. The first column contains "Header title 1" and "Subtitle 1". The second column contains "Text 1" (a red box) in Track 1. The fourth column contains "Header title 2". The fifth column contains "Text 2" (a blue box) in Track 2. An "Export Board" dialog box is open, showing the "General" tab. The "Main Grid" section has two radio buttons: "Export only the notes in the visible screen area" (unselected) and "Export everything (past and future notes)" (selected). The "Sidebars" section has two checked checkboxes: "Export left sidebar" and "Export right sidebar". The "Export To..." button is visible at the bottom of the dialog.

Below the text board, a screenshot of Microsoft Excel is shown, displaying the exported data. The Excel spreadsheet has the following content:

	A	B	C	D	E	F	G
1	Demo Board 03	Header title 1			Header title 2		
2	Track 1	Text 1					
3	Track 2				Text 2		
4	Track 3						
5	Track 4						
6	Track 5

The scaling of the mini-menu container (icons)

The scaling has been fixed and improved of the icons on the note mini-menu.

We introduce our new web client.

Features in the web client:

- List overview of one's project boards.
- List overview of notes on the individual project board.
- Editing of notes.
 - Edit the body text in the note.
 - Edit status of the note.
 - Edit position of the note in column and row.
 - Edit the note color.
- Creation of new notes.
 - Add a body text to the note.
 - Selection of status on the note.
 - Selection of position of the note in column and row.
 - Selection of the note color.

See pictures of the web client on pages below.
